

Sirs

The SIRI merger should be approved beyond the shadow of a doubt. I believe that if you do not allow the merger that XM will probably go under which would be the same as if the two merge in terms of monopolies.

The satellite receiver does not replace Traditional radio, it augments it. The same as FM and AM. It is Just another option. I would still listen to my local radio stations for local news.

I don't see where denying the merger and forcing one of these companies to go under will benefit anyone. As far as competition for what I listen to while driving, I don't have a sat radio currently but I have 1 gig of music on my phone that I play through a modulator over an AM radio band. If all the sat stations go away there is plenty of comp for what people are going to listen to.

How about pushing this one through with a big OK!!!!!! To the merger and getting on to real problems like the 50 phone calls I get every day from companies that I don't want bothering me, and how about the fact that I have to subscribe to Direct TV if I wasn't to watch NFL direct ticket. Is that a Monopoly? I think so.

Let the merger go through and get on with real issues. Get it right!
